## Product Information Bulletin

### Pro-Clear Millennium

#### Wash water bio-slime elimination

### Product Description

*No more slime in your processors wash water*

**M**etafix introduces the Pro-Clear Millennium. The Millennium ensures a slime free wash tank in your processor.

By incorporating a state of the art microprocessor, exact amounts of Metafix's high performance wash control biocide is metered into the processors wash tank only when required.

The compact design holds one litre of super concentrate biocide, which cuts down on expensive shipping and results in easy handling for health and safety.

This solution is supplied in three blends, "A", "B" and "C". By using alternate blends the bugs never get used to the biocide resulting in low injection rates and low treatment costs.

The built in screen shows how many litres of water have been treated and the dose ratio.

A built in alarm system indicates when the biocide solution runs out.

The results? “ **Clean processor wash tanks and cleaner drains.**”

### Features and Benefits

- ◆ *Low cost*
- ◆ *economical*
- ◆ *Wall mounted*
- ◆ *Totally sealed unit (no chemistry smells)*
- ◆ *Requires only a 240v power socket*
- ◆ *Compact design: 17 cm H x 13.5 cm W x 8.5 cm D*
- ◆ *Easy to install and maintain*
